Professional Experience

Davidson

Fullstack Web Developer Vue/Nest

June 2024 - Present

Joined the development team for the internal project Alfred, Davidson's CRM dedicated to commercial management. My primary focus was on overhauling the URL navigation system using Vue.js router. In addition to this main task, I contributed to bug fixing and assisted in implementing notifications and to-do lists. I also participated in code reviews as part of the Git workflow.

- Frontend: Vue.js.

- Technical Environment:
- Backend: Nest.js.
- MySQL database. - Git for workflow management.

Skills:

- Overhaul of the navigation system with Vue Router. - Debugging and resolution of frontend and backend issues.

- Agile collaboration: Scrum, sprints, code reviews.

- Contribution to the implementation of task notifications. - Participation in peer reviews to ensure code quality.

EDF

Atos

NIFI Developer

As part of the management of nuclear projects, implementation of Nifi flows (graphic ETL), in order to manage, transform and upload to the Unify tool data related to project management

(contracts, costs, risks, etc...). Creation of VBA macros in order to format/extract data provided in excel workbooks. Technical environment:

September 2023 - Current Position

- Nifi 1.9 - Java 1.8

- VBA
- Unifier
- Skills:

- Creation/testing of nifi flows - Creation of nifi processors developed using java.

- Creation/testing of VBA macros. - Configuration of the Unifier database in order to test the correct operation of the nifi flows.
- Agility: scrum, scrums, backlogs, sprints, PI planning.

CEA Frontend web developer Angular

Atos

May 2023- June 2023

The table was created in Angular 15 using the Reactiv Forms library. Data is transmitted from a dotnet C# API.

Proof of concept development. The POC is a table that can handle 50 rows simultaneously and

ten columns. The table includes around forty controls of several types: by cells, on a complete

- Reactiv Forms library. - API rest dotnet.

Technical Environnement:

- Mysql Database

line and multi-line.

Skills:

- Serveur front Angular 15.

- Creation of a form of around ten columns based on a mockup. - Collaboration with a UX designer to improve the interface.
- Implementation of around forty different controls on the table cells and rows. - Marginal dotnet API development.
