Skills

Core Stack

Java (v6 to v21) / Spring Boot
Angular / TypeScript
PostgreSQL / REST APIs

DevOps & Quality

Docker / GitLab CI
JUnit / SonarQube / ESLint
Clean Code / SOLID / CI/CD

Other Ecosystems

Node.js (Express / NestJS)
Vue.js
MongoDB / PL/SQL (Oracle)
Apache NiFi

Certifications

- AWS Cloud Practitioner (2023)
- DevSecOps Foundation (2023)
- 2AICConcept Expert Trainer (2024)

Education

- M2i *POEI* *Fullstack Spring/Angular* (2022)
- OpenClassrooms *Fullstack Node/React* (2021)
- ENSGSI *Master's Degree in General Engineering* (2013)

Profile

Generalist Engineer (ENSGSI) and Fullstack Developer with 5 years of experience in enterprise environments (Atos, EDF, Agirc-Arrco). Java / Spring Boot and Angular specialist, combining technical training capabilities with software quality expertise (CI/CD, Clean Code, Testing). Available immediately.

Professional Experience

— SOFTWARE ENGINEERING & DEVELOPMENT —

Java / Angular Fullstack Developer *October 2022 – June 2023*
Atos (Key Accounts: Agirc-Arrco / CEA)

- Architecture and development of web applications: Angular frontend integrated with Spring Boot REST APIs.
- Data modeling and query optimization using PostgreSQL.
- Implementation of unit testing (JUnit) and integration into Agile (Scrum) delivery pipelines.

Java Developer / Data Integration *September 2023 – June 2024*
Atos (Client: EDF) – NiFi / Java

- Design and development of custom Java processors for Apache NiFi.
- Automation and security enhancement of inter-application data flows.

Fullstack Developer (Vue.js / NestJS) *June 2024 – September 2024*
Davidson

- Frontend architecture refactoring (Vue Router, todo/notification modules) and code reviews (Peer Review).

— TECHNICAL TRAINING & CONSULTING —

Technical Trainer & Fullstack Mentor *October 2024 – Present*
Freelance & Training Organizations

- **Java:** Delivered training modules covering advanced Java features (v6 to v21).
- **Angular & Web:** Modular architecture, components, services, RxJS, Reactive Forms.
- **Databases & DevOps:** SQL/PostgreSQL, advanced PL/SQL (Oracle: stored procedures, triggers), Docker, Git, CI/CD, and automated testing.

Freelance Software Developer *April 2025 – June 2025*
Arterrien & Independent Projects

- Ongoing maintenance of an ERP module (PHP/Dolibarr), PHPStan integration (level 4), Dockerized CI/CD runner on GCP, and PHPUnit testing.
- Custom feature development and integration for web applications (Clémentine, La Boîte à Récup).

Other Experience

2013 – 2020 (7 years): Cross-functional background in logistics project management (medical & sustainable logistics), entrepreneurship (startup co-founder), and interpersonal communication training.
