Skills

Core Tech Stack

Java (v6 to v21) / Spring Boot
Angular / TypeScript
PostgreSQL / REST APIs

DevOps & Quality

Docker / GitLab CI
JUnit / SonarQube / ESLint
Clean Code / SOLID / CI/CD

Other Ecosystems

Node.js (Express / NestJS)
Vue.js
MongoDB / PL/SQL (Oracle)
Apache NiFi

Certifications

- AWS Cloud Practitioner (2023)
- DevSecOps Foundation (2023)
- 2AIconcept Expert Trainer (2024)

Education

- M2i *Intensive Fullstack Spring/Angular BootCamp* (2022)
- OpenClassrooms *Fullstack Node/React Certification* (2021)
- ENSGSI *Master's Degree in General Engineering* (2013)

Profile

General Engineer (ENSGSI graduate) and Fullstack Developer with 5 years of experience in enterprise environments (Atos, EDF, Agirc-Arrco)[cite: 1]. Specialist in Java / Spring Boot and Angular, with proven dual expertise in technical training and software engineering quality (CI/CD, Clean Code, Testing)[cite: 1]. Available immediately[cite: 1].

Professional Experience

— SOFTWARE ENGINEERING & DEVELOPMENT —

Freelance Fullstack Developer (PHP / Nest / Java) *April 2025 – Present*
Arterrien & Independent Projects

- **Accounting Application (Clémentine):** Development of custom features, management of complex financial business logic, data flow automation, and transaction security[cite: 1].
- **POD E-Commerce Platform:** End-to-end design and development of a Print-on-Demand platform using **Spring Boot (Java 21)** and **Angular 21**, **PostgreSQL** persistence, and cloud deployment via **Render (CI/CD)**[cite: 1].
- **ERP Module Maintenance & Enhancement (PHP/Dolibarr):** Integration of PHPStan (level 4), GCP Dockerized CI/CD runner, and PHPUnit testing[cite: 1].
- Custom web application development and system integrations (La Boîte à Récup)[cite: 1].

Fullstack Java / Angular Developer *October 2022 – June 2023*
Atos (Major Accounts: Agirc-Arrco / CEA)

- Architecture and development of web applications: Angular frontend connected to Spring Boot REST APIs[cite: 1].
- Data model design and querying using PostgreSQL[cite: 1].
- Implementation of unit testing (JUnit) and integration within Agile (Scrum) delivery cycles[cite: 1].

Java Developer / Data Flow Integration *September 2023 – June 2024*
Atos (Client: EDF) – NiFi / Java

- Design and development of custom Java processors for Apache NiFi[cite: 1].
- Securing and automating inter-application data flows[cite: 1].

Fullstack Developer (Vue.js / NestJS) *June 2024 – September 2024*
Davidson

- Frontend architecture refactoring (Vue Router, todo/notification modules) and code reviews (Peer Review)[cite: 1].

— TECHNICAL TRAINING & SERVICES —

Tech Trainer & Fullstack Mentor *October 2024 – Present*
Freelance & Training Organizations

- **Java:** Conducting advanced training on Java features (v6 to v21)[cite: 1].
- **Angular & Web:** Modular architecture, components, services, RxJS, Reactive Forms[cite: 1].
- **Databases & DevOps:** SQL/PostgreSQL, Oracle PL/SQL (procedures, triggers), Docker, Git, CI/CD, and automated testing[cite: 1].

Other Experience

2013 – 2020 (7 years): Cross-functional background in logistics project management (medical and sustainable), entrepreneurship (startup co-founder), and interpersonal communication training[cite: 1].
